(2) Rationale

In consideration of the fact that net income attributable to owners of parent in this current fiscal year exceeded our earnings forecasts announced on February 13, 2026 and the shareholder return policy for the period of the Medium-term Management Plan (FY2021-FY2025) as described below, the Company has decided to pay a dividend of JPY 74 per share—an increase of JPY 4 from our latest dividend forecast.

Shareholder Return Policy

Based on a consideration of the balance between shareholder returns, financial soundness, and investment for growth, the Company's basic policy is to maintain a dividend payout ratio of approximately 50% during the period of the Medium-term Management Plan (FY2021-FY2025).

However, the target dividend payout ratio will be set between 50% and 60%, while giving attention to the stability and continuity of dividends, and the Company will aim to increase dividends per share (DPS) from the level of the initial dividend forecast for FY2024 (JPY 52).
